Proper advice

We have made it easier for you to find the best interior solution to meet your needs. These helpful icons will give you a quick overview of each of our products properties..

ICON Visual Privacy

Visual distraction can be detrimental to our focus and concentration. In addition, our abilities to read visual cues help us to understand speech better and so increase the potential for distraction. Use this product to reduce visual distraction or improve visual privacy.

ICON Speech Privacy

Distraction distance is perhaps the most important measure in open plan office acoustic assessments. When someone speaks, a certain number of people around them will be able to hear them clearly and will most likely be distracted by them. Use this product in conjunction with others to reduce distraction distance and improve speech privacy..

ICON A – Absorb

This product is acoustically absorbent and reduces the reflection of sound off hard surfaces.

ICON B – Block

This product is suitably dense to reduce the transmission of speech sounds from one area to another. Creating barriers to sound disrupts the sound path which means that sound travels less efficiently across the space.

ICON S– Space saving

This solution is built to fit in modern, flexible facilities that need the ability to reconfigure or move furniture rapidly and efficiently. The product construction and design make it easy to handle. Use this product in an agile environment or where you need a space saving solution.

ICON M– Multiple functions

This product is versatile and multifunctional and can be used in a varietiy of facilities for several different tasks.

ICON CL – Cooperative learning

Adaption and flexibility is important in modern educational facilities. This icon means that the solution can easily change from one function to another – from lecturing stage to group work in seconds.

ICON Reverberation Control

Rooms with too much reverberation (echo) can be uncomfortable and normal conversation may be difficult. Additional absorption is required to reduce reverberation by preventing reflection off hard surfaces. Use this product, along with others, for the control of reverberation at speech frequencies.

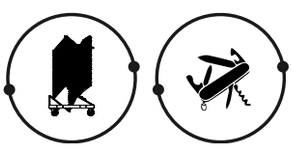
Meets the RoHS and REACH directives



We dare to say...

The organically shaped design creates a fantastic coherency and graphic feel to the room. We love it, when we see how clients' explore the possibilities and maybe even dare to break the colour theme with one or several colours. Who would you rather eat lunch with: the calm and quiet one or the fun and energetic...?

88 great reasons...Almost.

- Super stackable
- Optional armrests
- Seat or inside upholstery
- Superb sitting comfort
- Part of a big chair family
- Noise reducing feet and construction

FourSure® 44 & FourReal® 74

Designed by Strand & Hvass I Four Design

Part of the more curvaceous FourSure® range, the FourSure® 44 is an extremely comfortable four-legged stacking chair available with or without arms. FourSure® 44 is extremely comfortable due to its unique V-shape, flexible back and organic curves. FourSure® 44 is the perfect choice for canteens, meeting rooms, lecture rooms, or for office visitor seating.

Why choose FourSure 44®?

Frame: Chrome (III) / Matt lacquered white , black or warm grey
EN 1021-1
Meets the RoHS and REACH directives
The chair can be separated into parts and recycled

What you maybe didn't know...

What you maybe didn't know...
The Loop armrest is a new addition to our chair families.
Just by adding an armrest to a meeting chair you help prevent
invasion of your space (from direct contact to 60 cm). By adding an armrest you can help eliminate the feeling of having your territory invaded and thereby reduce the activity in our natural centre of fear (amygdala); this enables better concentration around the meeting table.

Why FourSure® 99?

- Seat or inside upholstery
- Superb sitting comfort
- Part of a big chair family
- Noise reducing feet and construction
- Return mechanism
- Built-in free-float system

FourCast2® XL & XL Plus

Designed by Strand & Hvass

With excellent seating comfort and broad leather topped arms, FourCast2® XL is an elegant armchair for the meeting or boardroom. Fully upholstered, the FourCast2® XL is classically chosen in leather, but is available in a wide variety of fabrics. The four star base is fitted with glides, whereas the five star base has the option of castors and gas lift. An automatic return can also be selected on chairs without castors.

The high back FourCast2® XL Plus is also available. It offers the same features as the XL with the addition of a higher back rest for enhanced comfort.

Features

W: 59 cm, H:84 cm D: 53 cm, sitting H: 45,5 cm
Polyshell in different colours : PP, glassfibre reinforced
Frame: Chrome (III) / Matt lacquered white, black or warm grey
Meets the RoHS and REACH directives
Castors (4)
Gas lift
EN 15373
Meets the RoHS and REACH directives
The chair can be separated into parts and recycled

Something to consider...

The FourCast XL chair is an extremely comfortable and stylish choice for the meeting room.
With almost endless upholstery options you can choose the exact look to match your interior.

Why FourCast2® XL?

- Superb sitting comfort
- Part of a big chair family
- Return mechanism
- Built in free float system

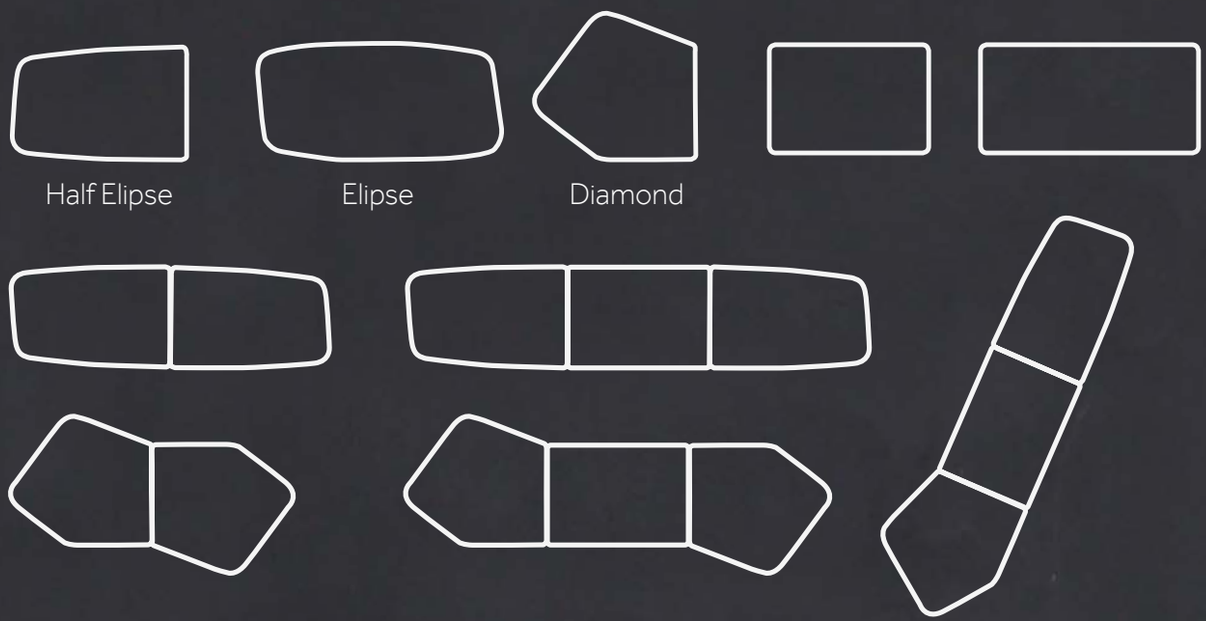
FourReal® 741 Flake

Designed by Anders Nørgaard

Shapes & combinations:



Create and recreate, again and again, the meeting room design with FourReal® 741 Flake tables. These innovations are built on the ideas of democratic design and developed to meet the needs for agile and flexible solutions for people to meet at eye level. FourReal® is an inspiring framework for cooperation and mobility for any working environment.

The tangible design and organic shapes and curves makes FourReal® 741 Flake a natural gathering point, whether for 4 or 10 people. Four Real® tables can be used to create a dynamic and fun space as the options can be connected and reconfigured to create a whole new room design. The tables are designed by Nørgaard Design.

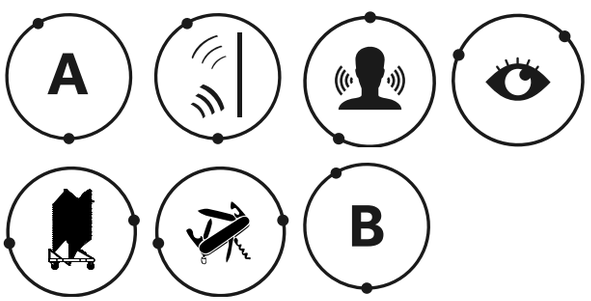
Room in Room & FourReal®

Designed by Four Design

By simply clipping the FourReal® space-in-space partition to the FourReal® table you create small intimate work areas in larger rooms. The clever design allows one person to quickly create a workspace with improved acoustics and a sense of privacy.

Features

- Board with decor laminate with ABS edging
- 138 x 138 cm
- Acoustic panels and wipe boards available
- The Room in Room can be separated into parts and recycled



Why choose Room in Room?

- RinR can be fittet to all FourReal tables
- RinR can be removed and stored with the folding tables
- Tables can be upgraded with RinR at a later date
- Optional fabric acoustic panel
- Make even “dead” square meters usable

Room In Room

Designed by Four Design

Why choose Room in Room?

- RinR are be removable and easily stored along with the folding Four Real tables
- Tables can be upgraded with RinR at a later date
- Creates the perfect spot for group dynamics
- Optional fabric acoustic panel
- Enables 'dead' square-meters

Can be separated into parts and recycled

Why FourReal®?

- Space-saving - multifunctional
- Part of extensive table and chair family
- Choice of several finishes
- Enhance any space
- Durable
- Slim design

Fabricks™

Designed by Nigel Sikora

Fabricks™ are super acoustic bricks made from acoustic foam and wool fabric, designed to look fabulous, divide space and reduce noise. Quickly configured and reconfigured, Fabricks™ offer the flexibility to change spaces in the modern open plan workplace by creating walls for meeting spaces and individual work areas; the dynamic of a space and even the location of power can be altered in moments.

With great acoustic credentials, Fabricks™ combats the poor acoustics and visual distractions that lead to reduced productivity. Fabricks™ are tested to ISO 10053 and BS EN ISO 354:2003 achieving Class A sound absorption (BS EN ISO 11654) and fantastic sound attenuation results.

Fabricks™ is a modular system of extremely lightweight bricks, a simple steel base and extruded aluminium posts; it is easy to specify and easy to build. The 'house brick' style gives interlocking rigidity to the design. The extruded aluminium posts also accommodate power and data cables and can be combined retrospectively to alter the height of walls.

Walls can be created with traditional 2D flat face bricks, or 3D sculptured face bricks, offering a beautiful textured finish. The fabric colour options and pixelated nature of the bricks allow you to match decor and seating fabric.

Fabricks™ offer great acoustic and visual privacy without building permanent floor to ceiling rooms, so expensive mechanical reconfigurations can be avoided and air will flow across the open plan area.

Everything has been designed for simple, quick installation and reconfiguration.

Whether you are designing for workplace, hotel, education or leisure environments, Fabricks™ can divide spaces to help reduce noise and visual distraction; it's also the perfect flexible, colourful, quick-build wall system for exhibition stands.

Why Fabricks?

- Reduced dilapidation costs
- No mechanical or engineering reconfiguration
- Easy reconfiguration
- Match fabrics to furniture

What the experts say...

Fabricks™ is unique in its versatility and performance. As a Class A absorber it can be used effectively for the control of reverberation within a space; however, it is also an effective screen against noise and has good sound attenuation properties, which means it can be used to improve both speech and visual privacy. Due to its easily reconfigurable nature, the user can adjust the size and shape of Fabricks™ to create spaces of different levels of acoustic privacy.

To get the most out of the product, it is best installed in an area where there is a highly absorbent acoustic ceiling and appropriate levels of ambient noise.

Features

2D flat face and 3D sculptured face lightweight bricks
3 different lengths (30 cm, 60 cm or 120 cm), 2 different heights (20 cm or 40 cm)
90° corner bricks
Typical configurations 160 cm, 180 cm or 200 cm high
Over 30 standard colours from Camira Blazer Lite
Extruded aluminium posts with ability to house power and data cables

#InnoPodByFourDesign

InnoPod®

Designed by Anders Nørgaard

InnoPod® is a truly flexible mobile workspace that can be moved to create a private area exactly where you need it. Fitted with large castors, you can spin InnoPod® round to create a barrier against visual and acoustic distraction; you can even quickly change the desk height to your desired working style.

InnoPod® is perfect for large spaces, busy areas, or anywhere where you need a touchdown workplace. Taking up only about 1 square meter, InnoPod® s can also be used together to create banks of flexible working areas.

Features

InnoPod® H: 205 cm x W: 130 cm x D: 95 cm
InnoPod Big® H: 205 cm x W: 190 cm x D: 95 cm
Nano-laminate 21 mm table top with impact
Resistant ABS edges in white, anthracite and black
Two desk heights
Table top 49 cm x 81 cm and table top 118 cm by 81 cm
Chair suspension options
Large castors for easy movement
Available in a range of fabrics
EN 1023

What the experts say...

This semi-enclosed workstation can be easily moved to provide visual and acoustic privacy. Where privacy is required, the InnoPod should be positioned such that the open sides are not orientated towards the listener, and placed in an area with adequate ambient noise levels. While many booths and screens work best under highly absorbent ceilings, the integrated ceiling of this product eliminates this requirement.

*Visual and acoustic privacy subject to orientation.

Den.

Acoustic work areas

Den is a range of acoustic work areas created to make public spaces private. The environment we work in has to facilitate both the privacy needed to concentrate and the space needed to collaborate. Large open spaces with shared working areas create lively exciting environments, which cultivate greater collaboration. But what happens when you need a quiet area? Den reduces visual and acoustic distraction; it is about creating the most effective environment for you to work happily and efficiently.

Den's unique junction system enables numerous configurations to be constructed with shared components, unlike other acoustic workstations which extend their configurations by placing stand-alone units back-to-back. This modular design ensures an economical construction, which can be easily extended and reconfigured to suit your changing needs.

Den Sit/Stand

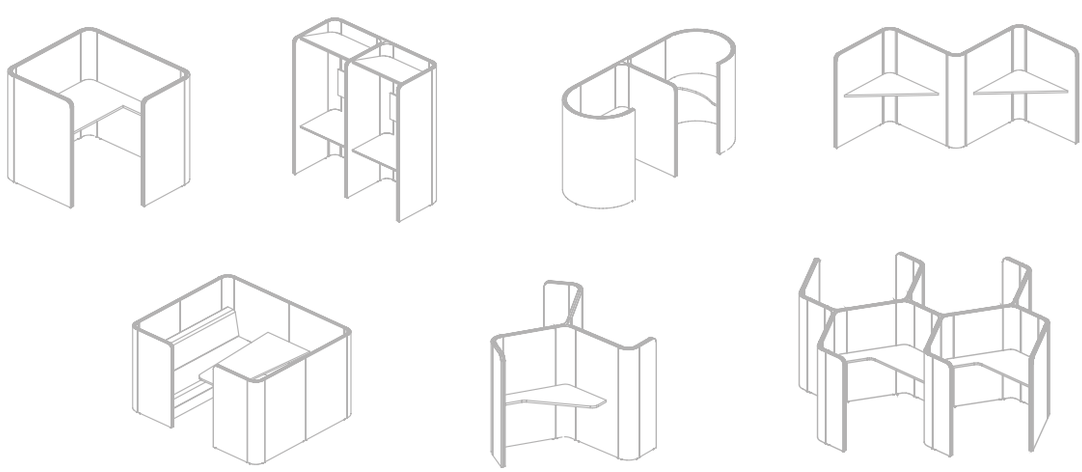
Den Booth is also offered with an electrically controlled sit/stand desk to ensure that you change your working position to aid health and wellbeing.

What the experts say...

The sound absorption provided by the Den screen prevents sound from being reflected off its surface, as it is with typical non-acoustic desk screens. These screens also provide a degree of sound attenuation, thereby playing a role in reducing the distraction distance in offices, creating a more comfortable acoustic environment.

Features

- 8 styles with an array of accessories
- Acoustic panels
- Unique junction system with shared components for economical construction
- Designed to allow numerous configurations and reconfigurations including bespoke specials
- Plain and quilted fabrics
- Silver or black trim line
- Worktops in a variety of finishes with a matching or contrasting edge
- Worktop sizes of 43mm, 25mm and chamfered 12mm
- Soft seating options
- Full selection of lighting, power and connectivity options
- Electrically operated sit/stand desk available in the Den Booth with Linak push button control
- Den canopy with light available on Den Diner and Den Booth
- 98% recyclable
- 5 year warranty



*Visual and acoustic privacy dependent on height of screen.

FourUs® Corner

Design: Anders Nørgaard

FourUs® Corner

Design: Anders Nørgaard

Cosy Corners and Calm Retreats

Need a break? Designed for privacy and comfort, Four Us® Corner is an aesthetic corner sofa that provides the perfect spot for the coffee break, encourages social interaction, or creates the best frames for an informal meeting.

Whether placed against a wall or in the middle of a larger room, the high backs of Four Us® Corner form a room inside the room and thus create little oases of peace in different areas of the building. The sense of privacy is ensured by the ears of the sofa which create the warm and cosy enclosure needed for a calm retreat in a comfortable environment.

In co-operation with award winning designer Anders Nørgaard, we have created the visionary zoning concept Four Us®. With their minimalistic design inspired by Danish 50's classics, the Four Us® sofas are modern and pleasing to the eye. We also considered your comfort and designed the sofa with an extra-supportive cushion to take great care of your back.

The FourUs® family features several modules and countless options when it comes to colour and choice of fabric, thus giving you the possibility to personalise your new sofa. With Four Us® you get a room with better acoustic, aesthetic design and diversity – you get a room with opportunities

Harc Tub

Designed by Roger Webb Associates

YE
AH!

Harc Tub

Designed by Roger Webb Associates

Harc has been created to facilitate the basic need to listen and to provide a comfortable place to reduce the surroundin gnoise. The name Harc echoes the arc shape with its sweeping curves that wrap around to create a warm and cosy enclosure.

Features

High back, single seat chair

Fully webbed seat for additional comfort
Powder coated cast aluminium, chrome and wooden
Base options
Powder coating in a variety of colours
Available in fabric or vinyl with two-tone options
Power and data options
Table in a variety of finishes (Booth)
Scatter cushions available
High back tub chairs
Available in fabric, vinyl or leather with two-tone option
Moulded foam for additional comfort and durability
Chrome wire frame, wooden base or polished aluminium
swivel base with tilt and optional self-return
Minimum 95% recyclable
5 year warranty

The Harc range also includes complementary tables & low back.

What we know...

Harc Tub chairs are ideal for areas in which seating may be placed back to back, such as atriums or waiting areas
Both Harc Tub chairs provide a greater degree of privacy than a typical low-back seat. The Harc provides the next level of visual and acoustic privacy within the Harc range. Because of the relatively enclosed configuration, there are fewer direct paths in which sound can travel to nearby listeners.

To get the most out of the performance of Harc products, they
should be placed in an area where ambient noise levels are
suitably high and the ceiling above is highly absorbent.

Casino & Stools

Designed by Ocee Design

The **Casino** stool range is a great addition to any open space where touchdown seating allows people to take a break or catch-up with colleagues in an informal environment. The option of a single or double crescent enables a multitude of configurations to be created. Ball foot brushed chrome or polished chrome legs offer that extra finishing touch.

Features

- Round, 1 crescent & 2 crescent options
- Available in fabric, vinyl and leather
- 5 year warranty
- Minimum 95% recyclable
- CMHR foam
- Available with ball foot brushed chrome or polished chrome legs

Stools

Upholstered **Stools** are the stylish accessory for any contemporary reception, touchdown or breakout area. Dot, Dash, Morse, Code and Cube offer a range of shapes, heights, leg and castor options to suit any requirement.

Features

- Dot, tubular design with optional legs in two styles (height 400mm x width 470mm)
- Dash, square with optional legs in two styles (height 400mm x width 470mm)
- Morse, square with leg or castor options (height 465mm x width 470mm on castors)
- Code, tubular with leg or castor options (height 455mm x width 470mm on legs)
- Cube, (height 500mm x width 465mm)
- All available in fabric, vinyl or leather with two-tone options

Linking devices

Designed by Strand & Hvass I Four Design

Maximise safety and convenience with linking devices.
The linking devices are developed for spaces that continuously reconfigures and are ideal for community halls, canteens, event venues and schools. The devices prevent chairs from becoming unintentionally unlinked in the case of an emergency.

Both solutions allows the chairs to be rapidly moved apart and linked together to form and maintain a row.

Why choose this feature?

- Reduces cost of labour
- Conforms to fire regulations
- Chairs can quickly and easily be placed in large formations
- Maintains chair placement preventing unintentional detatachment
